

## Frequently Asked Questions:

**What flashlights will work with Elzetta ZROC?** Every Elzetta ZROC comes with Sizing Adapters, giving the Flashlight Holder the ability to mount flashlights from 0.7 to 1.1 inches in diameter (18 to 27 mm). This includes such popular flashlights as the Mini-MagLite®, PentagonLight®, Inova®, Streamlight®, Pelican®, Laser Devices®, and many SureFire® models.

**What advantage does the Quick-Release Thumb Screw offer?** The Quick-Release Thumb Screw allows flashlights to be installed and removed rapidly and without tools.

**Why does the Elzetta ZROC have an integrated Picatinny Rail?** The integrated Picatinny Rail allows the mounting of an additional accessory such as a laser or navigational light.

**Why does the Elzetta ZROC have dual Thumb Nuts?** The dual Thumb Nuts enhance the strength and rigidity of the device. This is an important feature when attaching an accessory to the integrated Picatinny Rail.

**What materials is the Elzetta ZROC Flashlight Holder made from?** The Elzetta ZROC features all metal construction with a main body of Mil-Spec Type III Hard Anodized 6061-T6 Aluminum, a matte black stainless steel flashlight clamp, and matte black steel hardware.

**Can the Elzetta ZROC be permanently locked to a rail?** Yes, the castle-style Thumb Nuts may be secured with safety wire or the included [cotter pins](#).

**Why are there two tapped holes in the Elzetta ZROC?** The two tapped holes accommodate the attachment of an [Elzetta ZPR118 Picatinny Rail](#), which allows the mounting of an additional accessory.

**How much does the Elzetta ZROC weigh?** The Flashlight Holder with hardware weighs 3.0oz (85g).

**Where is the Elzetta ZROC made?** All Elzetta products, including the ZROC, are designed, engineered, and manufactured in the USA using American tooling and American made materials.
